DETAILED ACTION

Claim 6 is presented for examination.

A request for continued examination under 37 C.F.R. 1.114, including the fee set forth in 37 C.F.R. 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 C.F.R. 1.114, and the fee set forth in 37 C.F.R. 1.17(e) has been timely paid, the finality of the previous Office Action has been withdrawn pursuant to 37 C.F.R. 1.114. Applicant's submission filed August 29, 2007 has been received and entered into the present application. Claim 6 is herein examined on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Unclear wording in claim 6 in the phrase "and catechin remove cellulite" because it is unclear whether the remove intended use modifies only catechin or other ingredients in the claim. Also, the phrase "catechin remove cellulite" is unclear if this implies a certain type of catechin or not.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as anticipated by Ekanayake et al. (H1628).

Claim 6 is directed to a composition comprising of theanine and at least one active ingredient selected from the group consisting of caffeine, genistein, L-carnitine and catechin.

The Examiner acknowledges that the preamble recites an anti-cellulite composition. The anti-cellulite is an intended use of the claimed components. The recitation "remove cellulite by reducing the activity of glycerol-3-phosphate dehydrogenase (GPDH) is also an intended. An intended use fails to materially or physically limit the structure of the composition and that so long as the composition of the prior art can perform such a use, then it meets the claim.

Ekanayake et al. teach a composition of tea extract comprising of theanine, catechins or flavanols (see col. 6, lines 45-59).

Ekanayake et al. disclose all limitations of and anticipate claim 6.

Applicant's arguments with respect to claim 6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

No claim is allowed.
